

SOQ - ENGINEERING SERVICES

ADDENDUM #1 – MARCH 18, 2019

QUESTIONS/ANSWERS

1. For the special purpose local option sales tax (SPLOST), is it just for road and drainage projects, or are there other projects? **There could be other projects, but it would not include those projects that will involve other grants that require other specific procurement guidelines such as ARC or USDA.**
2. For the GDOT local maintenance and improvement grant (LMIG), is it just for road and drainage projects, or are there other projects? **Specifically, for LMIG, it would only include road and drainage projects, however the Town could have other road projects come up that are not included on the LMIG application and would be paid for using SPLOST or other funds.**
3. The RFQ states that the qualified engineer is to manage and represent the Town throughout the phases of various projects included in the Town's SPLOST and LMIG projects ... Question, so just to confirm, the selected engineer is to ONLY manage and represent the Town on these projects and the selected engineer is not to perform design, bid, construction management and building acceptance, but just to oversee these services performed by a third person consultant? **The selected engineer will design, bid and manage all construction.**
